

FOR IMMEDIATE RELEASE

Noorduyn Norseman receives its largest order for its certified airborne stretcher

May 10, 2007
Montreal, Quebec

Noorduyn Norseman, a world leader in the design and manufacturing of galley inserts as well as specialized cabin products received its largest order for its airborne stretcher. Through UK sales partner Reheat International, Noorduyn and Reheat worked together to present a winning value proposition to its new client based in South Africa. The turn-key solution presented includes providing the stretcher, bulkhead modification kits, engineering support as well required certification from South African authorities.

The award illustrates Noorduyn's ability to assist its customer's worldwide with complete product and engineering support solutions. Delivery of the program should be completed in September 2007.

About Noorduyn Norseman:

Since 1933 Noorduyn Norseman contributes to the success of its customers through the design and manufacturing of specialized products for in-flight service. The company is renowned for its ability to respond quickly to specific needs of its customers offering the best time-to-market ratio in the industry. The company designs and manufactures in-flight service equipment and other specialized products as well as providing repair and overhaul services of on-board equipment.

About Reheat International

Reheat International Limited supports and supplies spare parts for aircraft galley equipment and cabin components manufactured by major interiors OEM's. Reheat is an EASA 145 & FAR 145 approved maintenance organization with a well equipped service center staffed by knowledgeable and experienced technicians.
